## Win Debate At Red Deer

Knox Young People's debating team carried away the laurels at Red Deer on Friday evening, when they debated against the team from Ponoka on the topic, "Resolved that direct relief is preferable to indirect relief in respect to the present unemployment situation."

The debaters were Tom Clarke and Albert Meston, who took the negative side. Tom Clarke took Joyce Morley's place, as she was in Edmonton. The previous night they debated against Ormond Phillipson and Reid Clarke as a preliminary, which gave them good practice.

Although Ponoka's team debated well and had good material, the Didsbury team was undaunted, but not as convincing in their own statements as they might have been. The judges unanimously decided the debate in favor of Didsbury.

Albert Meston has a most pleasing manner of speaking, while Tom Clarke excelled in his rebuttal.

The result of this debate brings the Didsbury team in line to debate at Edmonton, and the district should be proud of the honor brought here by its debaters both against Innisfail and Ponoka, also of these talented young speakers.

## WEEKLY SERMONETTE

If you have a grey-haired mother In the old home far away, Sit you down and write the letter You put off from day to day Don't wait until her every step Reaches heaven's pearly gate, But show her that you think of her Before it is too late.

## Red Deer Presbytery Meets at Didsbury

The Presbytery of Red Deer met in Knox United Church on Thursday afternoon May 4th, when a heavy docket of business was disposed of. Those present were: Reva A. J. Mitchell (Didsbury), chairman; H. Young (Crossfield), secretary; E. Armstrong (Olds); F. Miller (Bowden); C. E. Rogers (Carstairs) and Messrs Saunders (Olds); Belsaw and Winning (Crossfield); Hammill (Carstairs) and Dr. Clarke, H. W. Chambers, W. A. Austin, J. A. McGhee, J. Robertson, and J. W. Hutton (Didsbury).

The petition from Knox United Church, Didsbury for the withdrawal of the resignation of the Rev. A. J. Mitchell was readily granted and the members of the presbytery expressed their individual gratification.

The Didsbury charge was relieved of further responsibility for Westerdale.

A call from Olds United Church to Rev. F. E. H. James, of Castor, was sustained and ordered to be sent to the Castor Presbytery.

At the close of the session the members of the Presbytery were entertained at the home of Mr. and Mrs. G. A. Wallace.

## Salvation Army Play.

The Calgary Salvation Army will give a biblical play entitled, "The Master," at the Opera House on Saturday evening May 20th at 8:15.

The play is under the auspices of the senior Christian Endeavor Society of Zion Evangelical Church. Prices of admission: Adults 25c and children 15c. The Salvation Army Band will furnish music.

## LOCAL & GENERAL

Canadian Legion Field Day—Wednesday June 3th.

Miss Mabel Noble, of Calgary spent the weekend at the home of Mr. and Mrs. H. M. Reiber.

Mons Chapter, I. O. D. E. will hold a "Tag Day" on Saturday May 20. Buy a Violet and Help Mons Chapter.

Eyes Examined at the Rosebud Hotel, Didsbury, Wednesday afternoon May 17th. E. J. Anderson, B.Sc. from Calgary in attendance.

Mr. and Mrs. Bert Shantz and daughter, and Mr. Herchel Meyer, of Alask spent the weekend with the formers' mother, Mrs. Ephraim Shantz.

Miss Ira Rupp returned home last weekend after graduating at the University of Alberta. She will attend the convocation May 16th, when she will be awarded her B.A. Degree.

Mr. Dick Schotten, who has been appointed agent for the Canadian Oil Co. Ltd., has rented the old power house in the south part of the town and will establish a service station at that point.

Step, look, and read it yourself! The C. E. League of Zion Evangelical Church is holding a tea and sale of home-cooking at the vacant store west of Hawkes Cash Grocery on Saturday May 13th. Bring your friends. Afternoon and evening.

Messrs. Elmer Evans and George Hawkes, who have been attending the University of Alberta, returned home for their summer vacation last week. Mr. Gray Sharp, who has graduated in electrical engineering at the University, also returned home.

What is this thing called love, and why do they call it fate? The intimate diary of a penthouse play girl. Denied love she declared war on morals, and an open season on other women's husbands! Loyola Young in "They Call it Love," at the Opera House tonight (Thursday).

At the meeting of Mons Chapter, I. O. D. E., which was held at the home of Mrs. Sharp last Thursday, Mrs. Kendrick was appointed as delegate and Mrs. Ivan Weber as standard bearer, to attend the National Chapter to be held at Edmonton on May 28th.

A number of ladies surprised Mrs. Herman Hawkes on Monday afternoon on the occasion of her birthday. Those present were Mrs. N. Hunsperger, Mrs. Kendrick, Mrs. Ward Keith, Mrs. Fleury, Miss Clements, Miss Knudsvig and Miss Evelyn Liesemer.

## Masonic Order

### Entertains Guests

On Tuesday evening after their regular lodge meeting the members of King Hiram Lodge entertained their friends to a banquet in the Odd Fellows' Hall.

Despite the fact that the condition of the roads prevented the members from the country and their friends from attending, about 90 persons sat down to a sumptuous repast.

After dinner the Rev. Dr. Kirby, of Calgary, who is a Past Grand Master of the Order, gave a lecture on "Our Canadian Heritage."

Mr. J. A. McGhee welcomed the guests and Dr. Kirby moved a vote of thanks to Dr. Kirby for his most splendid lecture, which had given the audience much pleasure. Dr. H. C. Liesemer acted as toastmaster.

## Successful Concert.

A crowded house greeted the Community Players of the Mount Royal College, Calgary on Saturday night, when presented by the Ladies Aid of Knox United Church, Didsbury.

Three short comedies were given by the players and their clever acting reflects great credit on their director, Mrs. Helen B. Moller, B.A.

Barbara Brown and Thelma Wark, two clever kiddies delighted the audience with their dances and readings. Songs were rendered by Miss Marjorie Watkins.

A number of selections were given by the Didsbury Cantata Orchestra under the direction of Mr. Harold Olsen. This orchestra of local musicians made quite a hit with the audience and their clever handling of the various numbers brought considerable applause. Much credit is due to their director in bringing the orchestra up to their high state of efficiency. The people of Didsbury will look forward to hearing them again in the near future.

## Didsbury Athlete's

### Record Still Intact

In writing on records made in inter-scholastic track and field meets in the Calgary Herald on Saturday, Bob Mannin says:

"Stepping into 'C' class the sprint is lengthened by 25 yards, and the century mark of 10 4-5 seconds was set in 1924 by Russell Berscht, Mount Royal College, when he broke the tape a foot ahead of Paul Thompson, Chicago Black Hawks hockey star, who was running for East Calgary that year. It's the only record held by Mount Royal."

## Interesting Case.

An interesting case was brought before Magistrate Peattie at Didsbury Wednesday afternoon, when W. P. Shultz was charged by R. A. Lantz with stealing 1368 bushels of wheat, 608 bushels of oats and 100 bushels of barley, which was the third of a crop grown upon land purchased from Mr. Lantz under an agreement of sale, and contracted to be delivered to Mr. Lantz's account.

Evidence was given by elevator men that Shultz sold the grain on his own account and had not delivered any grain to Mr. Lantz's account.

Mr. Shultz made a statement that he had agreed to supply 250,000-ft. of lumber in place of grain from the 1932 crop and evidence was given that Shultz had given an order for lumber to Lantz and that Lantz had hauled one load of the lumber.

The magistrate remanded Shultz for trial at Calgary.

## Buys Distinguished Red Poll Bull Calf

Mr. G. A. Burns, of Didsbury has purchased a well-bred bull calf sired by "Mara Basidon Miner," No. 8748-55109A, imported by H. F. Wise, Galahad, from the state of Iowa a little over a year ago. His dam was imported from England two years ago and represents the blood of some of the best families in England. She has a record of 12,751-lbs. milk and 623.51-lbs. fat.

The dam of the Burns calf is a triple-bred Pear cow who holds the world's record, averaging 424-lbs. of fat for nine consecutive years. She is also a half sister to, and granddam of, "Pear Lee," No. 8281, who has just completed an official record of 7,210-lbs. milk and 370-lbs. fat in 305 days, with an average test of 7.13 per cent. She also produced, in 344 days, 7,523 lbs. milk and 387-lbs. fat, with an average test of 5.16 per cent as a 2-year-old. This record was made on just ordinary farm care—Galahad News.

This calf arrived last week by express and is now located on "Redburn Farm," east of Didsbury.

## A Lesson from Austria.

Perhaps Austria is where the term "taxoline" came from. At any rate taxes on gasoline amounting to 24c a gallon, plus other fees, have resulted in 16,500 Austrian automobiles ownerturning in their license plates in three months, says the Associated Press. A clear case of how the government can kill the goose that coughs up the golden shekels.

## The Jig-Saw Puzzle Of Life.

Have you participated in the prevailing rage or fad of these latter days of the depression—the jig-saw puzzle?

If so, what did you get out of it? A few idle hours of lazy enjoyment as you sorted out the many and variegated colored pieces, cut in all their fantastic shapes, and sought to fit them together? Is that all you got for your money, your time, your intent concentration? If so, it was largely waste, and you would have been better employed in reading, or some light occupation, or even lying down in quiet and complete relaxation.

Or did you, as your fingers played with the fascinating bits of colored cardboard and you pieced them together until out of a jumble of colors the design of the artist began to emerge into a thing of beauty, allow your thoughts full sway, and even study your own reactions to the comparatively like task in which you were engaged?

For example, as hour after hour slipped by while you selected this piece and that and maneuvered them about the table, endeavoring to make them fit where it seemed they ought to fit, but would not, did you become more and more impatient, or were you actually and truly developing what has become to many people—the lost art of patience? The question is: Did indulgence in this jig-saw pastime strengthen or weaken your will power to cope with the real puzzle which life itself presents?

Did working over the jig-saw suggest anything else to you? Did your employment in this form of recreation for tired bodies and troubled minds, lead to more serious thought, to a contemplation of the complications of life, the consolations of life, and as you finally solved the puzzle, the rewards and the beauty of life? Did you pause in contemplation of your own life, and give some heed to the pattern you were weaving out of the many pieces under your control to make it a thing of beauty, or mar it with ugliness?

A well known authoress writing in the current issue of a popular magazine, tells how she spent most of the night working over one of these intricate jig-saw puzzles. As she worked well into the small hours, the pattern of the puzzle continued to elude all her efforts; she could not make the design come together; it persistently lacked both coherence and purpose. She became discouraged as the hours went by, growing both impatient and inaccurate until, at last, in extreme desperation, she laid one improbable piece against the other one, and loathed those sections she had nearly completed.

Having almost given up hope of successfully solving the puzzle, she saw a certain inoffensive fragment of one side of the table. It was a tiny piece, and yet, when she had fitted it into the puzzle, her difficulties suddenly vanished. For that tiny fragment held the necessary clue to the puzzle's color and line. Set in its place, the pattern became clear and the design stood out in bold, brave fashion. In fact, in a very short time the jig-saw puzzle had ceased to be a puzzle, it had become a picture.

Surveying the finished picture, this authoress said to herself: "Life is pretty much this way. It is a mass of irregular, jagged pieces until we are able to find the secret of it. It seems absolutely without meaning until we've located the key piece."

The key piece—it is all important whether in working out the solution of a jig-saw puzzle of that still more intricate pattern of our lives. As the lady we have quoted further says, many of us work doggedly through the long darkness over the jig-saw puzzle called life. Often our prehistoric habit carries us well into the dawn, until we meet that hour when vitality is at its lowest ebb. We are prone at this time to grow confused and inaccurate, tearing up the bits that we have put in order, trying to fit impossible sections together in a foolish manner.

This is a dangerous period in our lives—in the lives not only of individuals, but of communities and states. It is then we are inclined to engage in rash experiments, to forsake all the groundwork and experience of the past. We do not always realize that we are discouraged and confused because the key piece is missing. But it is there, and inevitably, even though that piece has long shied up, we will find it, if we have patience and vision. It is not the part of wisdom to destroy the whole picture, but to continue to hunt for the missing piece, the key piece, that will serve to point out where other pieces have been misplaced, where additional pieces should be placed, until the whole stands out strong and splendidly complete.

And here is the greatest and kindest truth in the whole world—the key piece is usually a little thing that lies close at hand! This is true in a jig-saw puzzle employed to pass an idle hour; it is true of the key-stone of a great and beautiful building; it is true in life itself no matter how complicated and tangled it may seem.

As you work over your jig-saw puzzles, of what are you thinking? What are you making, what do you intend to make, of the all-important jig-saw puzzle of your own life?

## Unlooked For Discovery

### Tests At Cornell University Indicate Diet May Cause Heart Trouble

An unlooked for discovery that diet may cause heart disease comes to light with the death of "Depression," the prize synthetic diet goat of Cornell University.

Apparently in perfect vigor, "Depression" had excited a few days ago and dropped dead. Autopsy showed death due to degenerated heart muscle, in the ventricle.

"Depression," moreover, was the sixth goat fed on the synthetic diet, and all the others died of heart disease. This was a 100 per cent record for whatever caused the fatal diet deficiency.

The diet substitutes cellulose for hay. It includes starch, casein, the solid part of milk, various mineral salts, yeast and cod liver oil. It is fed to goats and other animals in the Department of Animal Nutrition under direction of Dr. L. A. Maynard and Dr. C. M. McCay. The object is to discover the food factors best for animals.

"Depression" was 30 months old, the first herbivorous animal in history to live any length of time on synthetic "hay." His age brought home the significance of the diet heart complex.

Whether there may be human lesions in the heart diet factor is not known. In view of the fact that heart troubles cause more than twice as many deaths annually in the United States as the next most fatal disease, cancer, scientists regard the goat experiment with interest.

## National Dairy Council

### Allan C. Fraser, Of Calgary, Is Appointed Secretary-Treasurer

Allan C. Fraser, well-known Calgary agriculturist, has been named secretary-treasurer of the National Dairy Council of Canada, succeeding W. F. Stephen, of Ottawa. Announcement followed the close of the two-day annual meeting of the council at Toronto.

W. H. Forster, of Hamilton, and P. C. Colquhoun, of Maple Creek, Sask., were returned as president and vice-president, respectively.

Feature of the annual meeting was the amendment to the constitution providing equal representation on the executive for producers and manufacturers. The latter had previously enjoyed two-thirds representation on the board. The number of voting delegates on the council was reduced from 33 to 18.

Producers named their executive members as follows: P. C. Colquhoun, of Maple Creek, Sask.; Norman Clarke, of Oldham, Alberta; H. H. Hurford, of Courtney, B.C.; Hector Cullen, of Turo, N.S.; and W. L. Carr, of Huntington, Que.

Manufacturers' representatives on the executive are: C. B. Price, of Montreal; W. H. Forster, of Hamilton; Robert H. Brierley, of Yorkton, Sask.; J. M. Caruthers, of Winnipeg, and W. G. Marritt, of Toronto.

Appointment of Mr. Fraser to succeed Mr. Stephen will take effect on the latter's 70th birthday, May 28.

## Debate Via Radio

### Speakers In Edmonton, Saskatoon and Winnipeg In Consecutive Discourse

The recent radio debate between representatives of the University of Alberta and the University of Manitoba was the first in local history and the third in a series. It was unique in that the public, listening in, heard speakers in Edmonton, Winnipeg and Saskatoon, in consecutive discourse, without a hitch or mechanical difficulty.

Telephone wires connected the three stations; and four times during the broadcast the flow of sound between Edmonton and Winnipeg, and vice versa, had to be changed by reversing the repeaters. This operation, requiring thirty seconds each time, was accomplished so smoothly that the public was unaware of it. And as a flourish of mechanical perfection, the Saskatoon station broadcasted music, while the judges were arriving at their decision, which was heard by receivers tuning in on all three studios.

Such types of broadcasting are passing the stage of "stunting," since they reach the public completely and clearly. It is another indication of the possibilities becoming apparent in radio, of a serious and thought-provoking character—Winnipeg Free Press.

## Bear Rugs Are Cheap

### Some Selling At The Pas For Only Ten Dollars

Fur rugs for floor covering are coming back into style as the result of low prices for skins. Making of bear rugs and the mounting of heads and paws and claws has developed into quite an industry at The Pas.

Little white bear rugs, a novelty of the Churchill country, sell as low as \$10. Little black bear rugs may be had for even less. A nice big polar bear rug is worth \$75. Black timber wolves run up to \$25.

## Another Aid For Aviators

With the aid of radio apparatus it is now possible to take off from an airport, climb up through fog and storms and then without once seeing the ground, to fly hundreds of miles to a certain destination, come down without seeing the ground and make a perfectly safe and normal landing.

bad complexion?

## Motorists Are Asking Outlet For Tourists

### Seventeen Miles Now Limit For Driving Outside The Pas

Motorists of the thriving northland mining town of The Pas, are bitten with the yearning and yearning for new highways to conquer. The tired business man here who goes for a drive cannot travel far. Seventeen miles is his limit—to Clearwater Lake. Thus has arisen strong agitation for an outlet to the outside world, a project that would lay a 10-mile stretch for three miles, wilderness to Hudson Bay Junction, in Saskatchewan.

A road of sorts to that point already exists but is not passable for cars. Brush has been cleared but grading has yet to be done. It is hoped to have this road opened up this summer and efforts are being made to have it graded as a relief measure. Motorists here have no opportunity to register high mileage figures on their speedometers. The traffic, made up of 50 automobiles and 35 trucks, and literally gets into a jam owing to the restricted driving area.

The car driver has a choice of four highways at present. The road to Clearwater Lake, which is the longest, is the most popular. Two other roads stretch for three miles, the other highway measures but four.

## Improving Wheat Section

### Scientists Aim To Produce Same Quantity From Half The Acreage

In the doubling of the wheat crop, but on the other hand producing the same quantity on half the acreage, and in that manner reducing the cost of production, is the aim of Dr. H. T. Gussow, Dominion botanist, who attended the conference of plant breeders and pathologists and cereal chemists from Ottawa, and the western provinces held in Winnipeg.

Dr. Gussow said that while success is not yet achieved, its attainment appears within measurable distance, though several years' further research and experimentation will be needed before this aim can be said definitely to have been reached. Dr. Gussow's interests extend from the Atlantic to the Pacific, and he has assistants all over Canada working on new or improved varieties of different plants. He is now making a tour of the west inspecting the results secured at different points.

## Potato Exports Heavy

Heavy shipments of potatoes from Prince Edward Island are being received at Halifax, over the lines of the Canadian National Railways and indicate a strong revival in the export business in this line from the Nova Scotia port. About 200 carloads in all have been booked for export and steamers have been chartered to load full cargoes for southern ports.

The Marla, a fish that is plentiful in Lake Winnipeg, is sometimes called the freshwater ling.

## FASHION HINT

"How to make my old short skirts conform to the new length was a problem to me until I hit on this plan. I dropped the hems; and as the part that had been turned under was darker than the rest, I redyed the entire dress, after having bleached the goods, following directions in the Diamond Dyes package."

"I used Diamond Dyes for the re-dyeing of course. I have dyed many things with these wonderful colors. They have saved me many dollars and have never failed to give perfect results—smooth, even colors and no fading or washing. Friends think my things are new when I redye or tint them with Diamond Dyes. They do give me the most gorgeous colors!"

Mrs. G.C. Levis, Quebec

## Helps With Inventions

### Wife Of Noted Inventor Gives Him Valuable Assistance

Mrs. Alice Mary Herbert Russell Brown, who announces in the "London Gazette" that she intends to assume the Christian names of her husband, Mr. Sydney George Brown F.R.S., instead of her own, is a most able lady, who has taken a leading part in developing her husband's amazing electrical and gyroscopic inventions. These have won him many distinctions. He is one of the greatest and most prolific inventors of modern times. By means of one of his inventions the Flying Corps first received wireless messages on airships and aeroplanes and his gyroscopic compass is one of the most interesting marine devices of the age.

## An International Preacher

### Has Church In Canada And Also In United States

With a church in British Columbia and another in Alaska, Rev. Frank H. Bushfield, formerly of Winnipeg, can claim to be working out church unity on an international scale.

His congregation worships in the United Church of Canada at Stewart, B.C., and the other, the Methodist Episcopal Church of United States, at Hyder, Alaska. Mr. Bushfield belongs to the Prince Rupert Presbytery of the United Church. He is a graduate of Victoria College, Toronto, and has served in Alberta, and Vancouver.

## A Good Egg Story

A versatile hen of New Rochelle, New York had two eggs, one of which was battleship grey and the other jet black. Then she laid an ordinary white one, much to the relief of Mrs. Michael Chiswell, her owner. The white one had a double yolk. The colored eggs are not broken, so the state of their interiors is not known.

W. N. U. 1999

## Headaches and Dizzy Spells Nerves In Bad Condition

Mr. Neil Crawford, Hamilton, Ont., writes:—"My nerves were in such bad condition I found it almost impossible to get a good night's sleep. I was also bothered with headaches and dizzy spells."

I tried many different remedies, but they did not seem to give me much relief, but after I had taken Milburn's Pills I feel that I am now in good health and hardly believe the change they have made in my condition."

For sale at all drug and general stores; put up only by The E. Milburn Co., Ltd., Toronto, Ont.

## Research Director Presents Many Striking Statistics To Indicate Upward Swing Of Wheat Prices

If history is to repeat itself, the all-time "low" in the price of wheat and probably of the general commodity price level has been reached.

This was the contention of Major H. G. L. Strange, director of the research department of the Seafair Grain Co., Ltd., Winnipeg, who recently addressed a meeting of the general membership of the Regina Board of Trade.

Major Strange presented many striking statistics to indicate wheat should climb to 67 cents at country elevators as the surplus disappears.

Major Strange based his contention of the all-time price level having been reached "on the fact that what is occurring today occurred following years of other years," and also on the report that the index number of wholesale prices rose from 63.6 in February to 64.4 in March, according to a statement issued by the Dominion Bureau of Statistics.

Displaying a chart showing 500 years of wheat prices, collected by George Broadbent, eminent wheat statistician of Liverpool, England, the speaker said it could be noticed the price of wheat was ever fluctuating as it marched through time, but at three periods from 1499 to the present, the price fluctuated very violently, both up and down, in periods corresponding to the three great world-wide wars: the 30 years' war in Germany, the Napoleonic wars and the recent World War—each of them over 100 years apart.

"The length of time these fluctuations have taken to rise and fall have been substantially the same during each of the three wars. From the high price of wheat in the 20 years' war in Germany to the bottom of the decline was 11 years, in the Napoleonic wars it was 10 and one-half years, and in the autumn of 1931, the eleventh year after the high price of wheat in the Great War, the decline was arrested in British sterling at Liverpool," the speaker said.

The price of wheat will rise at the country elevator two or three cents as the pound and dollar come closer together, Major Strange continued, adding that 10 cents should be the general commodity price level rise back up to the pre-war level. It would also rise to the extent of the additional 26 cents a bushel, altogether to a price at the country elevator of 67 cents, should the surplus entirely disappear, the speaker claimed.

"I do not hesitate to say," Major Strange commented, "that all the economic forces that impel themselves upon wheat are tending to push back the price to the 1915-16 level, but perhaps not higher."

Some of the "fallacies" people within the trade have felt obliged to oppose, the speaker said, were such as the wheat board, an excise tax on wheat for making bread in Canada, reduction of wheat acreage in Canada and other proposals to replace the present methods of handling and marketing grain in the Dominion.

"The futures system of marketing has been, and is being, violently attacked by those who favor a wheat board," the speaker continued, adding, "they carefully refrain, however, from explaining what a wheat board could do that the present system is not already doing. They speak vaguely of differentiating between returning the world's price of wheat and returning the world's value of wheat. A distinction absolutely impossible to define, because they are one and the same thing as far as money is concerned."

Some stated the futures system of marketing had no interest in discovering new markets and that perhaps a wheat board or some other organization could do this, Major Strange continued.

"The fact is today that there are literally hundreds at work exploiting every possible wheat market in the world to dispose of Canadian grain," the speaker said, "all experienced men, who are continually extolling the virtues of Canadian grain and endeavoring to promote its use."

"Much has been said about untapped markets for wheat in China,

This again is a fallacy," the speaker maintained. "The true facts are that China produces on the average twice as much wheat per year as does Canada, and in addition, four times the volume of rice that we do wheat in Canada, and that 430,000,000 people in China consume more cereals in the form of rice and wheat per head than do the people of Canada, so it is apparent there is not much evidence of starving millions and of unlimited markets. As a matter of fact, people in China are as well fed as we are. Starvation only occurs in certain districts with no communication, that suffer from drought and occasional great floods.

"It is often forgotten that wheat and other commodities can only be purchased by the people of a country in proportion that others are willing to purchase in turn their products of the goods they manufacture," Major Strange added. "The Chinese market for our wheat and other goods will expand as we or the other people in the world are willing to purchase Chinese products and goods. Money is so much, hardly enters into the question at all."

Reduction of wheat acreage by exporting countries by common agreement, would make European buyers suspicious, Major Strange contended, and they would tend to increase their own acreage and retain the tariffs and wheat quotas now existing.

By Ruth Rogers

533

### GRACEFUL FOR THE MATRON

By Ruth Rogers

Decidedly chic and slimming. Delightfully becoming to the larger figure is a dress of the type presented for today's pattern.

The smart reverse neckline is a particularly helpful feature to cut the bodice broad.

The skirt, panelled at the back with a bias yoke effect and vertical seaming down the center-front, are most slimming.

And how distinctive and smart your trim in this attractive bias due entirely crepe silk dress. For its trim, plain white crepe combined with a navy and white crepe print.

Style No. 533 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 3 1/2 yards 39-inch, with 1/2 yard 39-inch contrasting.

Its small cost will amuse you.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap cloth carefully.

## Watching For Contraband Shipments Of Munitions

Close Check, Ordered On Ships From B.C. To Orient

Customs officials at British Columbia seaports have been ordered to make a close check for contraband shipments to the Orient during the next few weeks. Inquiries in Jehol and the prospect of prolonged fighting have increased the demand for war materials, and it is suspected that munitions have been sent across the Pacific in the guise of ordinary merchandise.

There is a good deal of smuggling going on, according to investigators. Five hundred rounds of ammunition were recently discovered on the liner "Empress of Japan." This was shipped in boxes labelled with a bogus description and would have passed through undetected had it not been for the customs officials' special vigilance.

Of course, there is no embargo on war materials leaving the country, provided they have been purchased in a legitimate way and all other legal procedure has been observed.

For instance, the Japanese government recently completed purchase of a large quantity of steel track which has been lying idle at Port Mann ever since construction of the Canadian Northern Railway was suspended many years ago. This material will probably be used in the manufacture of munitions, but is considered a strictly business-like deal.

Consolidated Mining & Smelting Company at Trail is making regular shipments of zinc to the Orient and there is but little doubt that most of it is used in the making of shells.

### Improving Nature

The chemical process used by nature to make coal from peat has been speeded up. What nature takes millions of years to do may be done by scientists in three months. A scientist in Cincinnati, O., has isolated the coal germ and where this bacteria can be inoculated a peat bed so that it will turn into coal in a short time.

Demand for automobiles in Argentina in January was greater than the supply.

Benzol, an anti-knock for gasoline, is present in the waste gas of Turner Valley.

## A New Process For Sprouting Grain To Turn It Quickly Into Fresh Fodder For Cattle

### A Chinese Landlord

Cancelled Payment Of Rent But Ousted By Unemployed Man

Somewhere in the city of Halifax, there is a Chinese landlord with more "heart" than some of the English members of the rent-collecting fraternity.

In the northwest end of the city there is a family, the head of which has been out of work for a considerable period of time, with the result that they are now long on accounts and short of cash.

They live in a flat rented to them by the Oriental laundryman, who, along with other creditors, has been waiting for his money for several months. He called several times for the money and noted that each time the condition of the family seemed to be getting worse.

He called again recently and handed the tenant an envelope. The father of the family took it with a sinking heart, expecting, on opening it, to find a notice of eviction, which would throw him and his loved ones out on the street.

After the departure of his Chinese landlord he picked up courage enough to open the mislaid to discover to his joy that it contained, not an eviction notice, but a receipted bill for the total of his back rent, amounting to more than \$150, wiping off the debt in its entirety.

Needless to say, any feelings of animosity that this particular family might have entertained toward the yellow race was eradicated by this act of unsolicited kindness.

### Will Review Income

A review of total incomes received by pensioners in the government service will be made, and if any are considered excessive, the salary, but not the pension will be reduced. This, it is intimated, was the position of the government as outlined by Mayor W. J. Stewart, of Toronto.

People of Vienna, Austria, are eating less food per person than a year ago.

### BARRED SHAFTS OF WIT LOST G. B. S. ADMIRERS

The rapid-like wit for which he is famous was the cause of losing George Bernard Shaw, celebrated author and dramatist, two of his most ardent admirers during his recent visit to Hollywood. En route to San Pedro, Shaw stopped off at the movie capital to see at first hand how the great industry is operated. During a tour of the sets he was introduced to a number of famous film stars and it was at these introductions that G.B.S. gave his well-known wit the work-out that lost him two ardent fans. First, the visitor bluntly inquired of Alice Brady "why a girl with a nice face like yours wears a hat like that?" That pleased Miss Brady among the anti-Shawians, for while a woman will forgive many things, criticism of her clothes—her hat in particular—is not one of them. Shaw bowed his next barb when Evelyn Ann Harding was introduced. Miss Harding remarked that she was soon to play in one of Shaw's plays "Captain Brassbound's Conversion." Whereupon Shaw inquired where she had played the part previously. Miss Harding said "a little town near Philadelphia," and was astonished when the dramatist announced: "I'm sure it must be a piratical performance"—and as a piratical performance is the production of a play without payment to, or permission of the author, Miss Harding retired to her room in tears.

A new process for sprouting grain with a few days as it is turned into fresh fodder for cattle has been brought to the attention of German farm experts by Dr. Spangenberg, who believes that it will revolutionize cattle breeding by permitting industrial manufacturing of fodder.

The new process proposed by Dr. Spangenberg and recently tested by the German Agricultural Society is briefly as follows: The grain that is to be sprouted is spread upon large perforated iron sheets or riddles in a layer of about one inch. The riddles in turn are placed into open wooden cases of the same size, so that they are resting in the middle of the cases. By pouring a liquid over the grain at regular intervals a rich growth of light green sprouts is produced which may be harvested after ten to fifteen days, when they have grown to a height of 10 to 15 cm.

Dr. Spangenberg did not reveal the nature of the liquid used in his experiments and to which he attributes an especially quick growth of the sprouts and their—according to him—abnormally high nutritive value. Authorities on seed sprouting of the German Agricultural Society believe that this liquid is composed of phosphoric acid, potassium nitrate, potash and lime.

Similar mixtures have already been used for some time in experiments of this kind by the society. When testing the liquid applied by Dr. Spangenberg, the experts of the society applied at the same time their own mixture as well as pure water or other riddles, filled with grain. It was found that, as to the rapidity of growth, there was not much difference in the three cases.

The great advantage of this process is that it enables the farmer to introduce some variety into the menu of the cattle, especially in Winter, when no fresh fodder is available. It, moreover, seems to have a beneficial effect on the milk production. Dr. Spangenberg maintains that tests in Luebeck have shown recently an increase of the milk production by 18 to 22 per cent after feeding sprouts instead of grain only. Experts of the agricultural society, however, expressed some doubt as to the feasibility of fattening cattle, hogs and other animals by feeding them these sprouts.

This they declared, could be achieved only at much greater cost, which, in view of the relatively small value of fresh meat, would not pay. The reason why it would be more expensive to fatten cattle by feeding them sprouts than by feeding them ordinary grain is simple. Quite aside from the cost of the liquid used to sprout grain, the process of sprouting leads to a loss of nutritive value, caused by the lack of sunlight and the resulting inability of the sprouts to accumulate carbohydrates. Instead, the sprouts, biologically speaking, do nothing but accumulate water, which builds up a larger body compared to the small grain out of which it is developed. The carbohydrates contained in various forms in the grain are broken up by the sprout in the process of growing, and while the hydrogen is retained the carbon parts are emitted by the leaves in the form of carbolic acid. The sprouts are therefore of real value chiefly to chicken farms and dairies where a permanent supply of fresh, green fodder is desirable and where the high value of the product warrants the additional expense, it is pointed out by farm experts. The sprouts if harvested at the right time, represent an excellent fodder. According to Dr. Spangenberg, the cost of 220 pounds of sprouts produced from about fifty-five pounds of grain is little more than 20 cents.

### Exhibit From Alberta

Involving an expenditure of \$5,000, an Alberta grain exhibit is planned for Regina World Grain Show. Hon. George Hoadley, Minister of Agriculture, said if the report Manitoba intended expending \$5,000 on a grain exhibit were correct, this province would take similar action.

**Junior Wheat Clubs.**

The maintenance of a pure strain of seed grain on Alberta farms is a matter of vital importance. The tendency is for types to become mixed in the fields, the result being a hybrid that continually degenerates. When this comes to pass the wheat loses the superior quality of the original varieties.

One step towards maintaining true varieties of wheat for seedling is the development of the Junior Wheat Clubs organized a few years ago under the supervision of the Alberta Field Crops Commissioner. The various clubs were organized through the U.F.A., each member of each club being supplied with a quantity of pure seed. The result has been that over 2,000,000 bushels of high-grade wheat seed have been produced by the youthful farmers who belong to these clubs.

For some years the Alberta Wheat Pool has given material assistance to this movement. The interest taken by the junior wheat growers in the work and the splendid result obtained in the production of good seed, has been gratifying to the Wheat Pool.

During the current season there are 42 junior wheat clubs, with a membership of 704, participating in this work, as compared with 24 clubs last year, with a membership of 416. It is believed that the experience being gained by the young farmers participating in this work will prove invaluable in later years not only to themselves, but to the entire province and to the Dominion.

Following is a list of junior wheat clubs, with membership and variety of wheat being grown:

Marquis Wheat.

Lethbridge 17; How Island 20; Claresholm 13; High River 10; Woodhouse 20; Oyen 11; Bindloss 11; Huxley 14; Youngstown 19; Stettler 20; Craignyle 11; Falher 31; Donnelly 13; Fort Saskatchewan 11; Consort 25; Coar 8; Alliance 9; Sedgewick 10; Daysland 10; Slawa 14; Olanth 25; Edgerton 7; Derwent 19; Bruce 27; Viking 20; Andrew 25; Myram 27; Willingdon 35; Holden 16; Ryley 19; Vegreville 10.

**Here and There**

Another sale of salmon angling leases is announced in New Brunswick for the famous waters of the Upsalquitch River which will be leased to the highest bidder at a sale to be held in Fredericton, April 27. The leases will be for ten years from March 1, 1933.

Canadian railway salaries have experienced severe cuts over the past few years. This has applied to officers as well as to workers on the trains and along the lines. The recently issued annual report of the C. P. R. announced that E. W. Beatty, Chairman and President of the C. P. R. had instituted a special cut of 15 per cent for himself and the Company's directors. This makes a total cut of 25% for them since the decline in earnings began.

Nipigon River's famous speckled trout don't know it yet but the ukase has gone forth that non-residents shall pay only \$5.50 for an annual fishing license, or about half the charge hitherto. Further, Nipigon guides will offer their services this year for \$25.00 a week as against \$28.00 in 1932. These trout in the Nipigon pools and in those off the islands at its mouth including St. Ignace, run to seven pounds and up.

Canadian Pacific liner Empress of Japan recently hung up a new speed record when it travelled the 2,329 miles from Honolulu to Victoria in four days, eight hours and three minutes, clipping seven hours, 47 minutes from her best previous time for the voyage and much sustaining the best mark for any other Pacific liner except the Empress of Canada.

The literary hit of the year has been made by Frederic Niven, Canadian author, living near Nelson, B.C., whose "Mrs. Barry" has been recently hailed by authorities as one of the most profoundly moving books ever written. Mr. Niven, who thus breaks into the ranks of best sellers, earlier in the century handled baggage and freight for the Canadian Pacific Railway at Nelson.

H. P. Mathews, general manager, Canadian Pacific hotels in western Canada, with headquarters at Winnipeg, has been promoted general manager of the company's hotel system from coast to coast, with headquarters in Montreal, according to a recent announcement by E. W. Beatty, chairman and president of the railway.

**Overnight Bedroom Sleeping Cars Popular**

Please reserve bedroom on Canadian Pacific 11:59 p.m. train for Toronto, in a common call nowadays into the railway offices by the travelling public. The company reports a very heavy demand of late for this type of accommodation and this has necessitated operation of bedroom sleeping cars on the runs between Montreal and Quebec, Montreal and Toronto, Ottawa and Toronto, Toronto and Detroit, and Montreal and Detroit. Privacy, comfort and the last word in convenience and luxury are keynotes of this latest development in overnight travel by Canadian Pacific as expressed in these single and double bedroom and compartment cars, which represent the equivalent of the finest of hotel accommodations. They provide all the luxurious appointments of individual private rooms with a real bed that assures deep and refreshing sleep. Each room has toilet, lavatory, electric fan, overhead ventilator with exhaust fan, reading lamp and other conveniences, the whole being decorated in restful colors. In the double bedroom cars an overhead bed may be opened from the wall, if desired, affording additional facilities. Some further features of the sleeping cars may be enumerated, which make the hours of sleep so refreshingly delightful. Temperatures are controlled thermostatically throughout the train; roller bearings assure smoothness of motion; rolling mattresses invite restful slumber; heavily padded carpeting harmonizes with interior arrangements, creating a general cozy effect. Berths are wide and long and unusually roomy. The service is adapted to travelers as a masterpiece of transportation luxury and comfort. It is the realization of all these refinements of art and efficiency of modern equipment designs long have been increasing favor among travelers who claim high between good service and perfection in travel. The word "moderne" has its fullest and most inclusive expression in these cars.

In the women's dressing rooms attached to the sleeping cars there is real comfort and satisfaction. The most fastidious woman will find facilities such as she would expect in a first-class hotel. Mirrored dressing table and other toilet accessories provide maximum accommodation without over-crowding. Here are vanity chairs, hairbrushes, combs, apple artificial and natural lights in softly colored shades, spotlessly white lavatories with hot and cold running water, specially dispensed soap and a never-ending supply of clean linen. This affords the requisite pendant to refreshing sleep—refreshed toilette.

The men are treated in like fashion. They too have commodious dressing rooms where they can forego their rest only for the purpose of making their toilets but also for an enjoyable smoke before retiring for their hard sleep. Their room is perfectly lighted, well ventilated, amply supplied with lavatories of newest design and in decorations harmonizes with the general finish and furnishings.

Layout shows lower picture) single bedroom car and (above) double bedroom car.

**Alberta News Letter.****To Visit Peace River.**

The delayed visit of the Governor-General, the Earl of Bessborough and Lady Bessborough, to the Peace River district in Alberta, will be made this summer, according to word received from Ottawa. Arrangements for the visit are now under way.

**Win Fellowships.**

Two Alberta men, G. A. Harcourt and G. F. Stanley, have been awarded 1934 fellowships by the Royal Society of Canada, in geology and history respectively. The fellowships are valued at \$1,500 each and provide for advanced research.

**March Coal Production.**

Total production of coal in Alberta for March was 349,459 tons, as compared with 411,033 tons in the same month last year.

**University Graduates.**

About 300 students of the University of Alberta will receive degrees at the annual convocation to be held May 16th. This year marks the 25th anniversary of the establishment of the University.

**Must Buy on Grade.**

Hoggrading regulations providing for purchase of hogs on grade, which was endorsed by the Alberta legislature last year, has now been put into effect by the Federal government. It is announced from Ottawa, and purchase of hogs at shipping points must now be settled on the basis of grade.

**Five Livestock Shipments.**

One of the best shipments of livestock to leave southern Alberta was made some days ago from Lethbridge, when 66 head of beef cattle were forwarded to the British market. The cattle were fed for 199 days on ground wheat, ground flax and hay. Their maximum consumption per head per day was 15 1/2-2 lbs. ground flax, 3 lbs. ground hay, consisting of two-thirds rye grass and one-third alfalfa.

**Record Telephone Call.**

The record long-distance 'phone call for Alberta was effected from Edmonton by the government telephone system recently, when an Edmonton man talked to Cairo, Egypt, a distance of nearly 10,000 miles.

Calgary, Alberta.

**Alberta Crop Report.**

With the heavy rains at the beginning of the week the farmers are facing one of the latest seasons in the history of the province.

Some farmers are pointing to 1920 which season compared with the present one, but when later favorable weather enabled the farmers to harvest a bumper crop.

The following report issued by the department of agriculture shows conditions up to Sunday last:  
"With an unusually late start and with still occasional interruptions in some districts by rain and rather backward weather, seeding of wheat has been making slow progress over the greater portion of the province. At this date (May 10th) it is fairly general over the entire area, save in the Peace River and northern districts, where the drills are just commencing work. In south-eastern districts a considerable amount of wheat is already in the ground, up to 60 per cent, in a few sections, but for the remainder of the province the proportion completed is from 5 to 25 per cent, save in the extreme north. In south-eastern parts seeding of wheat commenced about the middle of April and was general by the 24th, with the occasional interruption. In the south-west seeding did not get fairly started until towards the 1st May and was general in this date. In central districts the same applies, but in the northern areas spring work on the land did not get underway to any extent until May 1st, and seeding has just started."

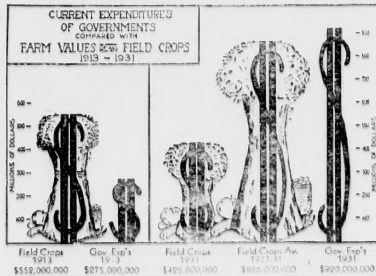

"In the southern areas there are indications of a serious grasshopper infestation. The provincial department of agriculture is making elaborate plans to handle the situation and have already the organization underway for the poisoning campaign and establishment of mixing stations at various points. Federal officials located in the province will co-operate in the campaign. Arrival of rains with chilly weather in some districts has helped to mitigate the situation."

**How Canada Gets and Spends**

A study showing the comparison between the cost of government in Canada and the (true) value of all field crops has been prepared by W. Sanford Evans and released for the National Committee on economy in public finance by the Canadian Chamber of Commerce. The study, as illustrated by the chart, indicates that in 1915 the total sum expended by governments for ordinary purposes was equal to 50 per cent of the farm value of all field crops in Canada. In 1931 government expenditure a sum equal to 218 per cent of the value of all field crops.

**CHEAP LANDS FOR SALE!**

160 Acres Improved Land West of Didsbury, 100 acres broken, 45 acres under summerfallow. Good buildings, spring and well, open range adjoining, near school. This is a good proposition.

## WORLD HAPPENINGS BRIEFLY TOLD

The Salta Observatory reported that volcanoes in the central Chilean mountain region were moderately active, with indications of intense activity in the near future.

Prof. Albert Einstein, who renounced his German citizenship because of anti-semitism in Germany, has accepted an invitation to become a member of the faculty of University of Madrid.

The French naval air force was ordered to help maintain order along the frontier of Djibouti territory in French Somaliland, Africa, where several rebellious Abyssinian tribes threatened trouble.

The honor of being the first woman professor in Scotland has fallen on Miss Cecilia J. MacTaggart, of Glasgow, who has just been appointed to the chair of Biology in the Anderson College of Medicine, Glasgow.

Calgary school board will take court action against parents who keep their children from attending school in protest against the city reverting to the summer unemployment relief schedule.

Wyoming has lost a titled ranchman and England has gained an earl. Oliver Henry Wallop, 72, renounced his allegiance to the United States, placed his chips in methuins and became the Earl of Portsmouth, the 16th ranking peer of England.

Alberta will have only two district courts if an amendment to the District Courts Act, submitted to the legislature, is approved. At present, there is a district court in each of the 16 judicial districts of the province.

Poultry markets in Western Canada are finding a market for their products in Great Britain. In the last two months of 1932, 1,260,000 pounds of fresh Saskatchewan and Manitoba turkeys were shipped to British markets.

Arthur Berwanger, of Stettin, Alberta, has been awarded the Elizabeth Forster memorial scholarship for 1933 at the University of Alberta. This entitles the holder to journey to Geneva for a summer course at the Zimmerli School of International Affairs.

## Argentine Delicacies

One Called "Palmito" Entails Cutting Down Palm Tree

The visit of the Argentine Mission to London has already had its influence on restaurants. Many are specializing in dishes and delicacies peculiar to South America. One of these is "palmito," an hors-d'oeuvre very popular with the Prince of Wales. He first tasted it at Buenos Aires three years ago. Its preparation entails cutting down a palm tree. The heart is then cut into cubes, soaked in oil, and served with lemon, anchovies, and sliced olives.

"What an appropriate-looking hot-dog stand!"

"Yes, it's made of dogwood and covered with bark."

## YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile

No Calumel needed

When you feel that sluggish, sour on the inside, that's your liver and bile. It's the daily two pounds of liquid that purify your blood. Liver and bile are being slowed down by a poisonous and chronic disease. Many liver troubles are due to bile, and biliousness is a common ailment. It is caused by a sluggish liver. It is the only way to get your liver and bile back to normal. It is the only way to get your liver and bile back to normal. It is the only way to get your liver and bile back to normal.

W. N. U. 1960

## A Cold Summer

Prediction That the Sun Will Show Less Heat For the Next Two Years

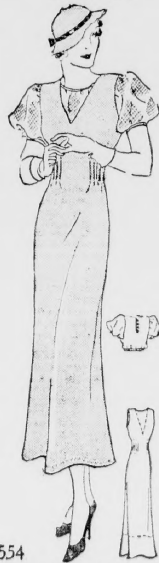

A prediction the sun will be colder for the next two years, with the possibility the earth will be affected in a way as yet unknown, was issued by Dr. Charles G. Abbot, secretary of the Smithsonian Institution.

Dr. Abbot already has had some success as a predictor of the sun's "weather." In 1930 he forecast two warm years on the sun, which in general has been fulfilled. Measurements have shown the sun has been giving out considerably more heat than normal since then.

Dr. Abbot's prediction is based on long study of periodical rises and falls in the sun's heat.

By Ruth Rogers

CHARMING DAY WEAR IN JUMPER MODEL—AFFECTS PRINCESS LINES

Looseness for daughter or for mother

Jumper dresses are so smart! Of course you'll want this princess model so youthfully charming.

It's carried out in navy blue crinkly crepe silk. The jumpsie is simple plaided cord. It's cunning the way it buttons down the back with tiny yellow ball buttons.

Pin tucks make the waistline fitting of the jumper. And incidentally the jumper is a one-piece affair. Made in a jiffy!

A girdled crepe silk would be effective for the jumper with the quip of plain tucking crepe.

8129 N. 554 is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 16 requires 2½ yards 25 or 26-inch, with 1½ yards 36-inch for blouse.

## Barter Party Is Latest

Social Event Held Recently in Buffalo Proved a Success

Bartering has reached the stage of social function in Buffalo, not merely because adapting amusement to hard times is a fashion of the day, but also because there is fun in novel experiences.

The Currents Event Club made up of women who have an eye for the economic stage which makes bartering necessary, has set the example with a barter party, and the members had such a good time that they voted to make it an annual event. The objects offered for barter were bracelets, neckties, book ends, preserves, cakes, use of automobiles, offers to see and mend, orders for gasoline, bridge lessons and a multitude of other things representing the activities of the modern woman.

## To Take Precautions

Parts Of Saskatchewan Threatened With Hopper Plague

Early precautions against the outbreak of a grasshopper plague in parts of Saskatchewan are urged upon farmers by officials of the department of agriculture.

Severe outbreaks of the plague are expected in southeastern Saskatchewan in the Estevan area, comprising a semi-circular tract of land including the towns of Torquay, Hinton, Villmar, Nottingham and Carmichael. The badly affected area also takes in a longitudinal strip up the centre of the province, starting in the south at Assiniboia and stretching far north in a narrow area to the southern boundary of Saskatoon. Lesser areas are located at Neudorf, Playart and Neptre.

## Protection For 'Planes

Ice Umbrella Will Shield Hub Of The Propeller

An ice umbrella for propeller hubs, a device said to overcome the last remaining ice peril for aeroplanes, was announced at Cornell University.

This umbrella shields the hub of the propeller.

The danger is not from the ice on or directly in front of the hub, but the danger is from the ice spreading in both directions outward along the whirling blades.

## Has Bullet-Proof Car

Viccount Bukhlo-Batko, Japan's elderly Premier, has bought a large armored American automobile. It is bullet proof against small weapons. The machine, costing \$30,000, is a closed limousine with bullet-proof glass. Threats against the Premier's life have been increasingly frequent. His two predecessors were assassinated by nationalist fanatics.

## Powerful Flashlight FREE for POKER HANDS!

ONLY Four complete sets of poker hands will secure you this handy flashlight (complete with batteries). Useful in the car or in the house and but one of the many valuable gifts given in exchange for Turret Poker Hands.

Sun ripened mellowness... extra satisfying flavour. That's the Quality you want in cigarette tobacco and that's the Quality you get in every package of Turret Fine Cut. And there's genuine economy too. You can roll at least 50 cigarettes from a 20c package.

It pays to "Roll Your Own" with **TURRET FINE CUT** CIGARETTE TOBACCO. **SAVE THE POKER HANDS**

## Trees Of Old London

More Than 700 Are Growing Within the "Square Mile"

To the casual visitor, or even to the daily worker, the City of London does not commend itself as being too well supplied with trees. And yet more than 700 forest trees may be found today flourishing in the "square mile," remarks the Overseas Mail. The City owes its trees very largely to the churchyards, which number 95. In 54 of them are growing trees varying in number from one to two to the forty odd of St. Giles, Cripplegate, and St. Paul's. In all these churchyards, the plane tree predominates; in fact, 450 of the trees in the City are planes, and almost entirely "London planes" at that. The London plane is considered to owe much of its vigor when growing in smoky places to the fact that its outer bark is shed annually. Given a certain amount of space and light it grows to thirty, no matter what the soil is like. An excellent example of this are the tall trees that ring Finsbury Circus. In the sixteenth century this area was merely a rubbish heap. In the 17th century it was raised three feet with broken bricks and laid out as a garden. In 1750 it was again raised with broken bricks and rubbish another three or four feet. On this is now growing a ring of plane trees. The tallest plane in the City stands in St. Paul's Churchyard, and is 167 feet high. The two finest specimens are, however, the Wood Street plane at St. Peter-at-Chepe, where Wordsworth's "Poor Susan" heard the thrush singing and fell to seeing a vision of green fields in Cheshire, and the great plane standing on that part of Basinghall Street that was once the churchyard of St. Michael Bassile-Law. The little twisting lines of old London run winding between huge blocks of offices instead of hedges, and have nothing of the country about them save their names: Ivy Lane, Love Lane, Rosemary Lane. But as they run now, so they ran before the Great Fire, when perhaps there were apple trees in Sweet Apple Court and lilacs blooming in Lillyput Lane.

## Sharing Large Houses

Fashion Introduced In London By Duke Of Connaught

In these hard-up times people in London are trying to solve the problem of being saddled with houses too large for them by dividing them into family flats. Instead of young married couples taking small houses in Chelsea or elsewhere, they install themselves in part of the parental home with separate housekeeping of their own. The idea was started by the Duke of Connaught, who gave Lady Patricia Ramsey, an "apartment" in Clarence House when she married.

## Made Success Of Hobby

A striking record was made by Constable Carl F. Walden, of Stockholm. He recovered 21,000 lost or stolen bicycles in his thirty-two years of service. He has not retired on a pension. Finding missing wheels was a hobby with Walden.

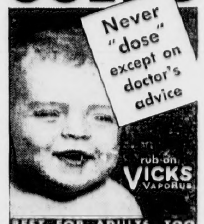

## Celebrating Its Jubilee

Alexandra Club Was Started In London By Women

The Alexandra Club, oldest of women's clubs in London, is about to celebrate its jubilee. It was founded in a day when women of good social position could not stay at hotels unless they were formally chaperoned. As to eating a meal in the public dining-room of an hotel or restaurant in 1882, it was simply not done by "gentlewomen." The Alexandra Club was started by a bold band of pioneers, who were liked by those restrictions. So carefully was it conducted that no man was allowed to enter the premises. To this day men are only tolerated at teas.

Dill, a herb used in making caraway pickles, grows wild in some parts of British Columbia.

### RUGBY NOTES

Rugby W.I. visited with Mrs. Clayhott for its May meeting. Notwithstanding sundry mudholes on the way, there was a good attendance, 22 members and some visitors being present. "Current Events" were taken up by Mrs. Farrant, and a most interesting paper on the topic for the day, "Canadianization" was given by Mrs. A. Hogg. Two vocal solos by Mrs. McFarlane were much enjoyed. Mrs. Evans was chosen as delegate to the forthcoming W.I. convention. In the darning and patching contest honors went to Mrs. Clarke and Mrs. Hoggood. When the meeting finally adjourned, the day was far spent and night was at hand when some of the members reached home. The June meeting will be held at the home of Mrs. G. Young.

### Burnside Notes.

Mr. Peter Gobert spent the weekend in Calgary.

Mr. Leon Doll spent Sunday with Mr. and Mrs. C. L. Cipperey.

Mr. and Mrs. Walter McCulloch spent Sunday with Mr. and Mrs. Otto Bittner.

The Lone Pine W.I. meets this Thursday, May 11 at Mrs. Charles Marden's.

Mrs. Otto Bittner was a Wednesday morning visitor with Mrs. N. Eckel.

Mrs. Killcapp and Mr. McReynolds of Calgary are holidaying with Mr. George Metz and family.

In spite of the backward spring a good percentage of the wheat has been sown in this district.

Mr. Fred Metz is very anxious to keep the road to Allingham in repair. Why?

Mr. Albert Spraggs and Mr. and Mrs. Otto Bittner spent Monday with Mr. and Mrs. H. B. Campbell.

### Seen and Heard Around Westcott

That Mert. Stringer has put off threshing again for a few days.

Norman Tuggle scratching his head and trying to plan a set of paddies for his John Deere.

Ira Scott out wading in the mud, singing to himself, "It ain't gonna rain no mo'" or at least it sounded like it, but we wouldn't be positive.

Lloyd Sundberg parking on the main road Sunday afternoon. Maybe he had so much mud on the coupe windows that he thought it was getting dark, or is it just a habit "Lizzie" has got into?

Jennie Stringer has a lamb. His fleece is white and trim. He's getting big and round and fat. But still she calls him "Slim."

### LOCAL & GENERAL

Canadian Legion Field Day—Wednesday June 7th.

Messrs. J. V. Berscht and Ed. Boetiger made a business trip to Calgary today.

The C.P.R. is announcing bargain fares to the East as from May 24 to June 8.—\$40.75 to Toronto and return. Other points similar rates.

Mrs. Reiber and Mrs. Wood are attending the central Alberta district convention of the W.C.T.U. at Wetaskiwin.

Mr. Hugh Lee, of the Alberta Wheat Pool Elevator, is being transferred to Vulcan. Mr. De Witt, of Vulcan will take charge of the Didsbury elevator.

The sermon subject next Sunday morning at Zion Evangelical Church will be, "The Mother of Jesus," and in the evening, "Martha and Mary." Go to church next Sunday in honor of "the best mother who ever lived"—your mother.

Special attraction at the Didsbury Opera House, Monday only May 22 The reigning triumph of London, Paris, Berlin, with Renate Muller, Jack Hulbert and Owen. Sarcasms laugh your way through life with "Sunshine Sue." Tantalizing songs, joyful romance, uproarious fun!

She made men and ruined women! She made a name for herself in "Frisco"—and "Frisco" made a name for her! She broke all of the ten commandments and if they'd made another one she'd have had a crack at that! See Ruth Chatterton in "Frisco Jenny" at the Opera House Monday and Thursday May 15, 18

The Christian Young People's Society of Zella will hold a special Mothers' Day service next Sunday evening at 8 o'clock. A special invitation is extended to all interested. Please note change of time and also the fact that meetings from now on will only be held every two weeks. Services on the alternate Sunday will be held at Harmattan.

### KNOX UNITED CHURCH NOTES

Rev. R. W. Hilbert, of Calgary will be in attendance at the Y.P.S. meeting on Thursday May 11th.

The services at Westerdale and Westcott will be conducted Sunday May 14th by Rev. T. Powell, D.D. at 11 a.m. and 2:15 p.m. respectively.

Mothers' Day services will be held Sunday next at 11 a.m. and 7:30 p.m. The theme of the service in the morning will be, "Happy Children in Happy Homes," and addresses will be given by the Minister on "Religion in the Home," and by Mrs. McGhee on "The Parents' Responsibility in making a Happy Home." Miss Alice Pearson will tell the story of "The Boy who wanted a Castle." The superintendent of the Sunday School, Mr. J. Boorman will have charge of the service. The same thought will be carried through the evening service, when the Minister will take for his subject "A Mother's Request for her Sons" (Matthew 20:20-23).

"O mother when I think of thee 'Tis but a step to Calgary. Thy gentle hand is on my brow, 'Tis leading me to Jesus now."

A very hearty invitation is given to all to attend both services and to worship the "God of Our Mothers" on Mothers' Day.

### Thieves Busy At Crossfield

The Crossfield post office was broken into early last Wednesday morning and an attempt made to get into the safe, but the burglars failed to do more than break the dial. The work was that of amateurs who evidently thought that all they had to do was to break off the combination to get into the strongbox. Nothing in the office was taken. Entrance was made by jimmying the front door.

McClelland's Drug Store was broken into a week last Friday night and the till, about \$15.00, taken.

The Imperial Oil warehouse was broken into a week last Sunday night and a gallon of lubricating oil taken.—Crossfield Chronicle.
